## **Redlands Courthouse to Receive New Roof**

On Tuesday the San Bernardino County Supervisors approved a new roof for the Redlands Courthouse Building. The current twenty-year-old roof is in a state of deterioration with multiple leaks that have damaged the interior of the building and some of its contents. "The verdict is in, and it is time the Courthouse receives a new roof before any more damage is done to the building or the critical documents it houses," said Third District Supervisor Dennis Hansberger.

The project will resolve the water ponding and drainage issues, and provide a single ply roofing system that is appropriate for the building. The new roof will be more durable, perform better in climate conditions, and has a minimum life expectancy of twenty years. The contract is with Best Contracting Systems Inc., the lowest bidder, for \$95,574.
